

IHA Data Services

There is no shortage of data available about Indiana health care. The difficulty is in making sense of it. For many years, IHA has served as a central collection point for statistics on inpatient and outpatient care, quality and safety and larger health care trends throughout the state. Using the information our member hospitals share each month, we've developed a variety of reports and analytical tools that give you an up-to-date, accurate and comprehensive understanding of your hospital's operations.

UTILIZATION

Inpatient/Outpatient Database

IHA tracks patient-level information for all acute discharges from Indiana hospitals, as well as information on ambulatory procedures, emergency department visits and other select services. Each quarter, IHA submits this data to the Indiana State Department of Health on behalf of members and provides you with a summary of activity at your hospital. If you're looking for actionable information on utilization trends, market share or service needs in your community, customizable reports from the database are available for purchase.

Dimensions

If you're looking for a robust and customizable reporting tool, you're invited to try Dimensions. Each Dimensions subscription includes hands-on training and continued support from IHA's data analysis team so your staff can get the most out of the product.

Indiana ChimeMaps

This tool is an innovative geo-solution that uses advanced mapping techniques to provide actionable insights based on hospital, health and population data. IHA members can use it to analyze service lines, conduct marketing assessments, conduct Community Health Needs Assessments and target health interventions.

FINANCE

DATABANK

Monitor discharges and patient days by payer, contractual adjustments, charity care and operating revenue on a monthly basis. You'll not only get a clear picture of your own hospital's performance, you'll see how it measures up against others in your region.

KEYSTATS

Understand the effect of changing Medicare reimbursement programs on your financial performance. As an IHA member, you'll receive periodic KEYSTATS analyses and reports to assist in determining the impact of reimbursement changes as well as estimates of trends and performance in CMS' various value-based purchasing programs.

Economic Impact

Many are unaware that hospitals play an important role in the local and state economy by providing high income jobs and economic activity. Hospitals are a stable economic mainstay, even providing growth during times of recession – an important message for policymakers, the business community and the public. IHA serves as a resource for this information for our members.

POPULATION HEALTH

IndianaIndicators.org

IHA, the Indiana Business Research Center of the IU Kelley School of Business and the Indiana State Department of Health developed IndianaIndicators.org to help hospital and community leaders anticipate and address changing health trends in their communities. Consolidating many data sources into one concise picture, IndianaIndicators.org provides an instant snapshot of health and economic trends in your community and across Indiana.

IHA Data Services

QUALITY AND PATIENT SAFETY

Comparative Outcome Profile

COP is an ORYX®-acceptable vendor that meets quality reporting requirements for both Joint Commission accreditation and CMS payment updates. It tracks more than 50 different quality measures to help identify potential problems, measure improvement and help hospitals understand how their safety practices compare to other institutions.

Culture of Safety Survey

Get an in-depth look at your staff and physicians' perception of patient safety within your hospital. This annual survey provides baseline data and historical trends to measure the impact of hospital-specific and statewide safety interventions.

WORKFORCE DEVELOPMENT

Compensation Survey

The annual survey is an IHA fiscal tool collecting and reporting salary information on more than 180 hospital positions. The survey provides timely access to relevant hospital salary and benefit benchmarks. Results are distributed to organizations that have submitted data.

HR Benchmarking

All IHA members who submit data to the survey have access to annual vacancy and turnover data through our HR benchmarking website. We also invite you to become a participant in our quarterly survey for more timely updates.

INhospitaljobs.com

Target your recruitment efforts and reach the most qualified health care professionals through IHA's career website. With your annual subscription, you'll receive unlimited job postings and a cost-effective platform for marketing your hospital to physicians, nurses, pharmacists, technicians and others in Indiana and surrounding states.
