# The Need

- The Indiana Hospital Association (IHA) and its member hospitals fully believe in the reporting and availability of quality and charge data.

- Transparency in quality and charge data leads to more informed patients, more confidence in the health care system.

- Any efforts to report hospital pricing should also include information on hospital quality measures.

- CMS and the Indiana State Department of Health make certain quality and charge data publicly available, but not in an intuitive, user-friendly way.

- As a result, IHA sought out a solution.

# The Result

An IHA task force of hospital leaders created mycareINsight.org, a hospital charge comparison and quality ratings website for Hoosiers.

my care INsight.org

# mycareINsight.org Overview

- Gives consumers easy access to hospital quality ratings and average charges for the 100 most common Indiana inpatient medical services

- Allows consumers better understanding of hospital billing and what questions to ask before seeking treatment
- Functionalities and features:
  - Search engine to look up charges by location, hospital and/or procedure
  - Search results that show available hospital quality data and charge data
  - Hospital-to-hospital comparison by quality
  - Tips, education and links to each hospital's website

*my* care **IN** sight.org

# In Conclusion

The mycareINsight.org price and quality transparency tool is:

- A user-friendly platform to access pertinent, publicly available charge, quality and comparison data

- A tool to help produce a more informed, educated and satisfied patient population

- A unique tool in the marketplace

- A working, editable platform that can be built upon based on need and newly available information
