

To learn more about sepsis, visit www.survivesepsis.com

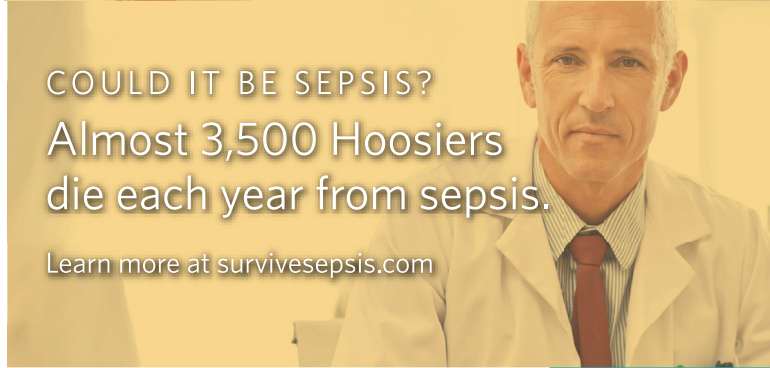

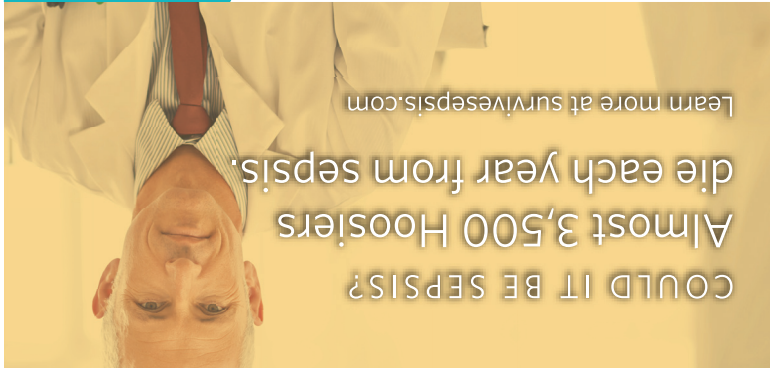

There is no single sign or symptom of sepsis. Here are some symptoms to look out for:

- Shivering, fever, very cold
- Extreme pain or feeling worse than ever
- Pale or discolored skin
- Sleepy, difficult to wake up, confused
- I feel like I might die
- Short of breath

Could it be Sepsis?

Sepsis is the body's overwhelming and potentially life-threatening response to an infection. Almost 3,500 Hoosiers die each year from sepsis.
