

# Uninsured 340B Prescription Discount Card

Safety-net hospitals and healthcare centers provide services for the uninsured. These uninsured patients can have a significant impact on the facility's bottom line. Much of the uncompensated care can be minimized with programs like providing medications at no or low cost. One of the intents of the 340B program is to pass along savings to the uninsured. This can be done with no additional cost to the healthcare facility.

A prescription discount program for your uninsured can deliver medications at significant discounts. These savings add up: the average annual savings to uninsured patients can exceed \$1 million.

Plus, from a risk perspective, you want to help ensure that the vulnerable populations you serve are getting their prescriptions filled. The result of prescription non-adherence can cost your organization in the long run.

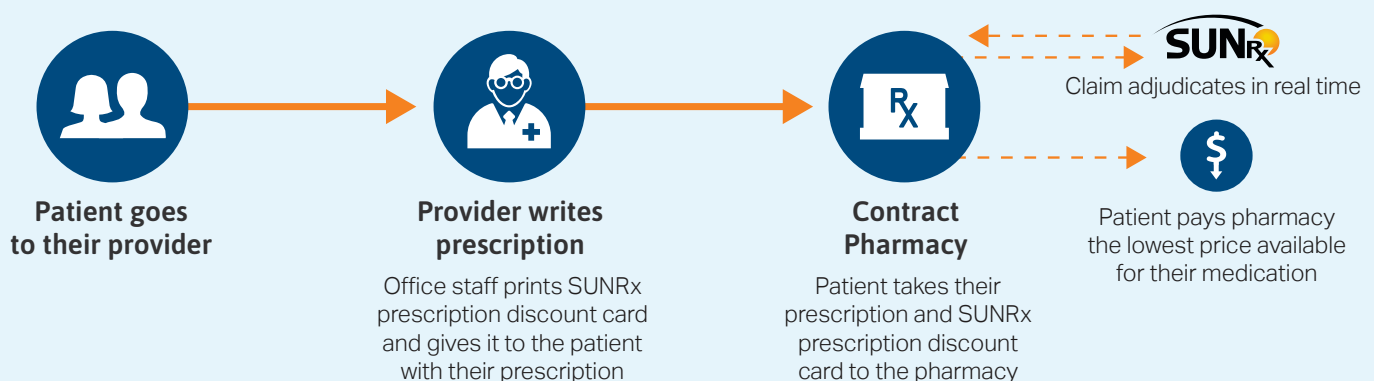

These savings can also be applied towards the hospital/healthcare center's community benefit report.

## Card Benefits

- ✓ Lowest price on medications is below 340B pricing 50% of the time
- ✓ Hospital/healthcare center can subsidize
- ✓ Cards are provided to the uninsured patients by the hospital/healthcare center staff
- ✓ Reduce the risk of Medicare readmission penalties
- ✓ Reduce the risk of higher Charity Care costs

## How the Card Works
