

80% of children are seen in general emergency departments – not specialized pediatric ones.

Is your ED ready for kids?

Join the Pediatric Readiness Quality Improvement Collaborative

FREE QI Collaborative June 2023–December 2024

PRQC will address four high-priority areas emergency care pediatric readiness:

- Patient safety
- Patient assessment and reassessment
- Pain Management
- Suicide

The aim of the new collaborative is to have 80% of participants establish a QI plan and implement at least one process change by December 2024. QI plans are associated with a 25-point increase in pediatric readiness, and high pediatric readiness is tied to improved survival for children.

WHY JOIN

- Access the latest in evidenced-based best practices and a new software system with real-time, patient-level data dashboards
- Engage in learning sessions and coaching from pediatric readiness and QI experts
- Network with and learn from other EDs
- Directly improve care for children in your community
